

Considering projection equipment for larger venues ? Why not forget plastic - based multi lamp hanging projectors and look at the professional alternative.

Using long life BARCO three chip DLP cinema projectors as our baseline. Future Projections have developed a number of solutions allowing non cinema venues to enjoy the flexibility, simplicity low cost of both purchase and ownership.

Digital Cinema Projectors are made to operate 24/7 and we have chosen the Barco range because they all use robust Xenon light sources. A typical lamp is WARRANTIED for up to 2400 hours and costs £355 - compare this to multi lamp E cinema projectors and the value of these machines really starts to add up.

All of our kits come with a wire remote control, a video interface and a scaling engine to allow almost every conceivable format to be played back. Simplicity and security are key - the projector has less than 12 buttons and the operator cannot (without password access) do any damage !

- on-site service
- industry standard security
- included lenses to allow location anywhere
- solid web browser advanced control
- only 12 buttons ! - fingerproof
- super low cost of operation
- remote monitoring
- 3d, high frame rate and DCI cinema included

| | ANSI | Ratio | Lamp cost | Lamps | Lamp life | (per hour) | Running cost | Unit cost | Total cost |
|-----------|--------|--------------|-----------|-------|-----------|------------|----------------------------|-------------|--------------------|
