

# W501 DLP® Projector

# A Powerful Performer

5000 Lumens, WXGA Resolution

Installation flexibility - Vertical Lens shift, 1.5x Optical Zoom

High brightness, excellent connectivity and amazing colours ensure the Optoma W501 Widescreen HD Ready projector is the perfect choice for any large venue or conference room.

Exceeding the demands of 21st century, the W501 is packed with wide array of features to make presenting both easier and more exciting than ever before...

The environmentally friendly W501 has energy saving features including Eco+ lamp power management, <0.5W standby mode and auto power off, saving you both time and money. Our unique Optoma Colour Guarantee ensures hassle-free, long-lasting projection.

### **EFFORTLESS PRESENTING**

Enjoy hassle-free presenting using the USB Reader to project a JPEG presentation directly from a USB flash drive.

Alternatively view up to 4 PC/Laptops side-by-side at the same time, using the free Optoma Presenter software...

...or even broadcast your presentation across a wired/wireless network to as many as 8 projectors simultaneously.

Wireless support requires the optional Optoma mini-WiFi dongle accessory, available separately.

### **DICOM SIMULATION MODE**

Designed specifically for larger meeting rooms and lecture theatres, the W501 includes a special DICOMsim mode that has been specially tuned for viewing greyscale images, perfect for viewing X-rays and scans during medical training.\*

\*The W501 is not suitable for use in medical diagnosis.

### **3D TECHNOLOGY**

Using the inherent speed of DLP® technology, Optoma Full 3D projectors can output video and images at an astonishing rate of 120Hz, allowing you to show full screen, full colour, stereoscopic 3D. The 3D effect is generated by splitting this signal into two standard video streams, one for each eye. Using DLP® Link™ technology, the 3D glasses synchronise with the image on screen to filter each stream to the correct eye. Your brain then combines the two streams to make them jump into life.

The W501 supports multiple 3D formats from various devices such as PC, Blu-ray 3D™, Sony® PS3, Microsoft® Xbox 360 or 3D TV broadcast

# The most intuitive way to present

Instantly present from your phone or tablet using the free App: VueMagic. Available for both Android and iOS devices, VueMagic. gives you the freedom to move around the room, share ideas and connect with your audience like never before, to create a more collaborative experience for everyone.

and pinch-to-zoom.

Use your device's touch screen to browse, flick between slides

# SCAN BARCODE TO DOWNLOAD VUEMAGIC

### **MOBILE VIDEO STREAMING**

Stream your mobile device's camera feed directly to your projector to turn it into a portable visualiser; Ideal for sharing ideas with larger groups.

## **EMPHASISE THE KEY POINTS**

Annotate directly onto your presentations in multiple colours, either freehand or using the tools provided.

Performer

### TRUE WXGA RESOLUTION

Documents and presentations will appear as sharp and detailed as they do on your widescreen laptop in WXGA (1280  $\times$  800) resolution, which also gives you 30% more pixels than an equivalent XGA projector.

XGA

WXGA

### **EXTENSIVE CONNECTIVITY**

This HD Ready projector accepts a wide variety of computer and video input signals. Connectivity includes: HDMI, DVI-D, dual VGA (Component via adaptor), S-Video, Composite, USB Reader, VGA-Out, RS232, RJ45 and +12V trigger. In addition the optional Wi-Fi accessory can be securely connected to a dedicated hidden USB port.

Five audio inputs for HDMI, PC, video and microphone sources enable the W501 to function not only as an audio switcher and volume controller, but also as a basic PA system for larger meeting rooms; thereby eliminating complicated and costly additional audio hardware and cabling.

### **EASY INSTALLATION - 1.5X ZOOM AND LENS SHIFT**

The W501 can project a 100" diagonal image from any distance

between 3.12m to 4.67m. The Lens Shift system can be used to adjust the vertical position of the projected image within the range detailed in the diagrams below. When replacing existing projectors, the 1.5x zoom and Lens Shift systems greatly increase your installation flexibility.

# **CLEAR, FOCUSED IMAGES**

DarkChip3™ from Texas Instruments, combined with Eco+ dynamic lamp technology produce a stunning 15,000:1 contrast ratio for pin sharp graphics and crystal clear text. Crisper whites, ultra-rich blacks makes images come alive and text easier to read - ideal for business and education presentations.

15,000:1 Contrast Batic

### **AMAZING COLOURS**

The W501 incorporates BrilliantColor  $^{\text{TM}}$  technology to produce stunningly bright images with perfectly balanced, life-like colours.

### SYSTEM INTEGRATION AND CONTROL

Using the free Crestron Roomview software, multiple W501 can be monitored over LAN and also provide the user with an email message alert in case an error occurs or a lamp fails. Cut up to 30% from your energy bills using 24-hour automated power scheduling to ensure that projectors power off when not in use.

The web browser interface and full support for Extron's IP Link, AMX dynamic device discovery and PJ-Link protocols, allow almost all aspects of the W501 to be controlled across a network, reducing installation costs and keeping you in control, wherever you are. While RS-232 connectivity ensures legacy support for existing control systems.

Global monitoring of all AV devices

Track projector lamp life

Email alerts and instant notificationshelp desk requests, service reminders, device failure or theft

Download Crestron RoomView® Express software from: www.crestron.com/getroomview

### **EASY LAMP REPLACEMENT**

In applications requiring smooth continuous operation, minimising service time is essential. The W501 lamp can quickly be replaced without the need to remove the projector from where it is installed.

### +12V TRIGGER

Power on both your projector and screen at the touch of a single button. For ultimate convenience, connect an Optoma electric screen directly to your W501.

For more info on Optoma screens, please visit www.optomaeurope.com

### **EXTRA FEATURES**

**Direct & Signal Power ON** – Start up time can be significantly reduced if standby mode is bypassed, eliminating the need to use the 'Power' button on the remote control or the projector keypad.

**Direct Power ON** switches the projector on when the power cable is inserted into an active power outlet.

**Signal Power On** switches the projector on when an active VGA source is connected to the unit.

**Key pad lock** – once enabled prevents unauthorised adjustments ensuring the projector can only be controlled via the remote control.

Logo capture - customise your start up screen

Easy to use remote with laser pointer, mouse control and direct source selection

# **GREEN SOLUTIONS**

# ECO+ TECHNOLOGY FROM OPTOMA INCREASES OUR COMMITMENT TO REDUCING THE IMPACT WE ALL MAKE ON THE ENVIRONMENT

### **ECO+ MODE**

Saving energy, saves money! Eco+ technology reduces the power consumption to as little as 30%. This intelligent feature also has a positive effect on the lamp life, increasing it up to 70% while lowering the total cost of ownership and reducing maintenance\*.

Power Consumption

### Dynamically adjusts the brightness and power consumption

Bright scene ~100% Power consumption

Dark scene ~ 30% Power consumption

### **AUTO POWER OFF**

There may be instances when the projector is left running when not in use. To help save energy if the projector is left running and no source is detected, the "Auto Power Off" feature automatically turns off the projector after a set period of time.

### **ECO AV MUTE**

Stay in control of your presentation with the Eco AV mute feature. Direct your audience's attention away from the screen by blanking the image when no longer needed. This also instantly reduces the power consumption to 30%, further prolonging the life of your lamp.

Eco AV mute off 100% Power consumption

Eco AV mute on 30% Power consumption

### **ENVIRONMENTALLY FRIENDLY**

To achieve the maximum lamp life, the projector should be operating in  $Eco^+$  mode and the auto power off feature should be enabled to automatically switch off the projector if it is accidentally left on. Enabling the <0.5W standby mode ensures the minimum energy consumption when the projector is not switched on.

We know that improving our products is the best way to reduce our impact on the environment. That's why at Optoma, we design our products to have a long usable life, use fewer materials, ship with the minimum packaging and be free of all possible toxic substances. Naturally, energy efficiency and being recyclable are built in at the design stage. With each new product, we strive towards minimising our environmental impact. For full details of Optoma Project Green please visit our website.
