

Section through box (side elevation.)

3 @ removable access panels, fixed projection window

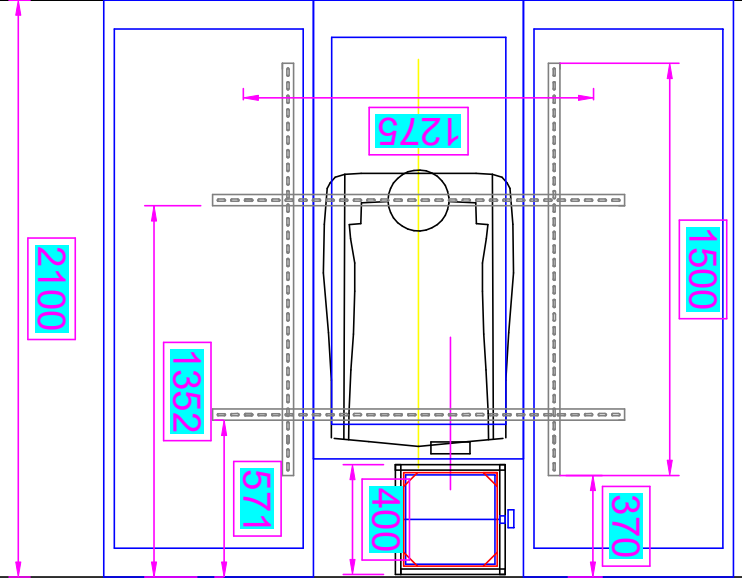

45 degree front surfaced mirror

Extract fan - side access typically EBM-papst C4W108GS1101 1030 m3 per hour, 66dB(A)

QUESTION - how do we mount projector ? Will the three legs / 4 mounting positions be OK for this ?

Will the extract work in the side rather than the top of the lamphouse ? (screen sizes 5m, Barco DP1200, 2k lamp or smaller)

Rear wall elevation.
